

Aspiring Software Engineer with foundational experience in AI/ML, Generative AI, and full stack development. Familiar with LLMs, LangChain, vector databases, Python, and modern web technologies. Eager to build intelligent applications, APIs, and automation solutions while growing in a collaborative, product-focused environment.

 PROFILE SUMMARY

- Software Engineer with 6 months of experience in AI/ML, Generative AI, automation testing, and full-stack development, building scalable production-grade solutions.
- Experienced in developing AI-powered applications using LLMs, LangChain, vector databases, and Python to enable intelligent automation and data-driven systems.
- Strong backend and full-stack development skills with REST APIs, microservices, Angular, Node.js, and FastifyJS.
- Hands-on experience in Selenium automation testing, cloud platforms, DevOps practices, and Agile development environments.
- Proven ability to design and deliver end-to-end solutions by integrating AI/ML into real-world applications, supported by strong DSA and system design fundamentals.

 WORK EXPERIENCE

Capgemini India | Software Engineer | Nov 2025 – Present | Bengaluru, India

- Designed and implemented AI-driven automation solutions using LangChain and LLM APIs to process user queries and optimize internal workflow, reducing manual effort by 30%.
- Developed robust Selenium-based automation scripts in Python for functional and regression testing of dynamic web applications, improving testing efficiency and reliability.

 INTERSHIPS

Deloitte India LLP | Technology Analyst Intern | Jan 2025 – Oct 2025 | Gurugram, India

- Contributed to enterprise application development using Microsoft Dynamics 365 (MS D365).
- Built Generative AI-based solutions, leveraging LangChain, MCP, and other AI/ML frameworks.
- Developed proof-of-concept (POC) applications to address real-world client requirements using AI/ML technologies.
- Maintained and contributed to project repositories and collaborative development workflow.

Global Child Prodigy Awards | Web Development Intern | Oct 2021 – Oct 2023 | Bengaluru, India

- Developed and maintained DevOps-enabled web solutions over a 24-month Agile development cycle, contributing to both front-end and back-end systems.
- Led UI migration initiatives and implemented dynamic labeling modules to enhance user experience.
- Independently delivered 20+ back-end APIs, UI components, blog pages, Git integrations & critical bug fixes.
- Contributed to continuous product enhancement through iterative development and deployment.

 PROJECTS

GenAI Policy Assistant | Tech Stack: LangChain, FastMCP, LLM APIs, Pinecone, MCP Servers | Aug 2025

- Built an intelligent AI assistant powered by LLMs, LangChain, and vector databases to enable efficient internal knowledge retrieval.
- Implemented semantic search capabilities to enhance response accuracy and reduce manual query resolution efforts by 40%.

Worktez & Meet Worktez | Tech Stack: Angular, Firebase, Node.js, FastifyJS, Jitsi APIs | Oct 2023

- Developed a comprehensive project management and collaboration platform using Angular, Firebase, Node.js, and FastifyJS.
- Built “Meet Worktez,” a real-time video conferencing solution integrated with Jitsi APIs to enable seamless team communication and collaboration.

 EDUCATION

- B.Tech. in Computer Science and Engineering, G.L. Bajaj Institute of Technology and Management, Greater Noida | 2021 – 2025 | CGPA: 7.9
- GATE 2025 Qualified | Score: 460
- Senior Secondary (CBSE), Bhaurav Devras Saraswati Vidya Mandir, Noida | 2019 – 2021 | 93.4%

 AREAS OF EXPOSURE

- Generative AI & Large Language Model (LLM) Integration
- Retrieval-Augmented Generation (RAG) & Vector Databases
- Machine Learning Fundamentals & Model Evaluation
- AI-Powered Application Development (End-to-End)
- Back-end API Development & Microservices Architecture
- Full Stack Development (Angular, Node.js Ecosystem)
- Automation Testing (Selenium, Pytest Frameworks)
- Cloud Computing & AI Deployment (AWS, GCP)
- Data Structures, Algorithms & Problem-Solving
- Prompt Engineering & LLM Workflow Optimization
- Agile Development & DevOps Practices
- Cross-Functional Collaboration & Product Thinking

 TECHNICAL SKILLS

- Programming Languages:** C, C++, Python, JavaScript, TypeScript, SQL, NoSQL
- Frameworks & Libraries:** LangChain, Angular, Node.js, FastifyJS, Pandas, NumPy, Scikit-learn, Selenium, Pytest, jQuery
- Tools & Platforms:** GitHub, Google Cloud Platform, VS Code, Google Colab, Figma
- Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Machine Learning Fundamentals, Data Analysis

 CERTIFICATIONS

- Angular & Front-End Development – LinkedIn
- AWS Certified Cloud Practitioner
- Cybersecurity Fundamentals – Palo Alto Networks
